Dear Sir:

Prior to examination, please amend the application as follows.

IN THE CLAIMS

Please add the following claims.

4. In a data processing system, an interrupt and task change processing circuit comprising:
- (a) a task enable circuit for determining from predetermined inputs whether a predetermined task is ready for execution by a central processing unit,
  - (b) a task priority selection circuit for determining an order for the running of tasks that have been determined ready for execution by the task enable circuit; and
